**THE AWARENESS FOR A SUSTAINABLE
& GREENER ENVIRONMENT STILL CONTINUES.**

“ We Do Not
Inherit the
Earth from
Our
Ancestors;
We Borrow It
from Our
Children “

This year kicked
off with the call
for application
into the Africa
Green Grant
Award 2020 on
the 1st of
January.

We have Sponsored
Several Green
Hangouts Within
and Outside
Nigeria. Watch out,
the next one may be
around you?

How are you
promoting the
Sustainable
Development
Goals? Remember,
this is our Decade of
Action, when no
one must be left
behind.

To spread our tentacles and
broaden our efforts to
fulfilling our organisational
goals, we are setting up state
representatives across
Nigeria and Country
Representatives in Africa to
oversee the activities of the
foundation in their zones.

Due to the current
outbreak of the
Pandemic, we have
been working on
other safer and
advanced
methods to enable
us deliver on our
activities and
events for the year.

LIGHT UP KAGARKO

Installation of solar panels on the roof of a building

The winner of the 2019 Africa Green Grant Award, Yetunde Fadeyi of Rees Africa and her team members set out to electrify three rural communities in Kaduna with no prior access to electricity. The project delivered SDG 7; Renewable Energy, working towards ending Energy Poverty across the globe. They emphasised the need for energy as a fundamental human right and pivotal in developing sustainable communities.

After the completion of the project which lasted for 5 days; 28th January – 2nd February, 2020, Rees Africa in conjunction with several organisations including the Eleven Eleven Twelve Foundation who was represented by Damilola Oladiipo electrified 91 households and provided 6 streetlights for these communities.

Representatives at Light up Kagarko

They have shown exemplary qualities in ending poverty across Nigeria by reaching the furthest behind which is the answer to leaving no one behind.

TWEETCHAT

The first EETF tweet chat for the year 2020 was facilitated by Mr Taiwo Adewole (an Environmental Consultant) who explained the

involvement of stakeholders and individuals in achieving a circular economy. According to him, the government has the most important role to play, coming up with strong policies to sustain the environment and shutting down companies that are not in compliance with environmental rules and regulations.

In addition, all individuals must do away with the “throw away” mentality and embrace the 3Rs; Reduce, Reuse and Recycling.

GREEN HANGOUTS

The purpose of the Green hangout is to bring together young like minds to deliberate on actions that would further lead to the achievement of our goals; the three pillars of sustainability. It is time to create a working synergy amongst environmentalists and climate change actors across the continent.

The foundation has sponsored five hangouts within and outside Nigeria.

OYO GREEN HANGOUT

The program was held on Saturday, 8th February, 2020 at 11:47am with over 100 participants present. The host, Miss Boye of Lead Radio 106.3FM welcomed the participants and expressed her excitement for being part of the Oyo Green Hangout 4.0, the first environmental gathering she is attending. Everyone present was asked to introduce themselves by stating their names, what they do and why they are passionate about the environment.

The Opening prayer was said by Miss Balqeez Adebisi Mr Zadok Adeleye, the Project Team Lead for the

Eleven Eleven
T w e l v e
Foundation, gave
the opening
speech. On behalf
of the Eleven
Eleven Twelve
Foundation, he
w e l c o m e d
everyone and

expressed his
excitement

concerning the youths getting involved to make the planet sustainable. He urged everyone to network, discuss and have fun as the program promises to birth greatness.

Mr Adetunji Lam-Adesina, the Founder of the foundation while addressing the participants pointed out that there are several opportunities in the environmental sector, most especially for young people because they are the future of not only the country, but the continent and the entire world. He also noted that the sector has been neglected for so long in this continent which is why there is the need to power up the sector and make sure the leaders and government directs their attention towards the sector. Furthermore, he posits that once the sector is promoted, the three pillars of sustainability; social, economic and environment will be achieved. He encouraged everyone to network as much as possible and have fun and to feel free to ask questions from Rt. Hon. Kehinde Ayoola, the Commissioner for Environment.

*Oyo State Commissioner for Environment
Rt. Hon. Kehinde Ayoola
Addressing the participants*

Participants

Several questions such as, what brought about the name Eleven Eleven Twelve, what we do exactly, internship and Graduate Trainee program were posed to Mr Lam-Adesina, which he answered accordingly. In order to liven things up a bit, the host had a game session of concentration were two winners emerged.

There was also an educative session of questions and answers relating to the environmental sector and the SDGs. All the winners went home with branded gift items. After having so much fun with game and random answering of questions, the Commissioner for Environment, Rt. Hon. Kehinde Ayoola was introduced by the host and brought forward to attend to questions being posed to him by participants.

The commissioner started by introducing himself and his

team members. He expressed his excitement to be in the midst of the young ones. He stated that one of the things youths should take control of now is the environment because it's our world.

A lot of questions ranging from Waste management, generation of data for easy approach to waste management issues, law governing the issue of burial

grounds, myths and traditions as it affects the environment, enforcement of laws were asked from the commissioner. The commissioner was magnanimous enough to give answers to all questions

asked. Among such answers he gave was that Oyo State is working on translating the regulations governing the environment to Yoruba language which will give a better understanding to the populace. He

also pointed out that His Excellency, Engineer Seyi Makinde, the Oyo State Governor recently launched the new solid waste management initiative which pinpoints the exact things to do in waste collection, storage and conveyance which will also give chance to

weighing of waste. This will help monitor the PSP, waste they carry and how they will be paid.

The commissioner further explained that poor attitude of people to proper waste management is mostly caused

by myths and traditions. He sighted an example of a slight flood that occurred at Olodo last year and how one of the residents said the reason for the flood is their refusal to make sacrifices/lack of quality sacrifice to Yemoja. He stated that there is already a plan to incorporate the solid waste component into the Ibadan flood management scheme and the

government is focusing on Education, Enlightenment, provision of adequate information among other things.

Rt. Hon. Kehinde Ayoola also noted that the government prohibits incineration and

now encourages recycling. He further mentioned that the State will be banning single use plastic very soon but it can only be brought out if a replacement can be provided which has actually been provided but halted

Participants

Participants

a bit because of the present epidemic issue in China. The commissioner ensured he gave good answers to every questions asked and it was obvious that everyone was satisfied.

A group picture was taken with the commissioner. The last round of game was tagged the green basket and was anchored by the host with many branded materials won by those that answered the questions picked correctly. As part of our vision to support like-minds in the industry in fulfilment of SDG 17; collaborative effort, opportunity was given to Recyclegarb a recycling outfit operating in Ibadan to speak about their upcoming activities and enlist people to join them in those activities.

Eleven Eleven Twelve Foundation Team Members in a group photograph with Rt. Hon. Kehinde Ayoola. The General Manager of the foundation, Barr. Adanna Kalejaye gave the closing speech, encouraging everyone to always ensure they engage only in environmentally sustainable acts. The event ended at 3:44pm with a short closing prayer led by Peter Salako.

Her Excellency, Arabinrin Betty Anyanwu-Akeredolu exchanging pleasantries with Mr Adetunji Lam-Adesina

The Eleven Eleven Twelve Team Members embarked on a trip to Akure on Thursday, the 13th February to pay the First Lady of Ondo State, Her Excellency, Arabinrin Betty Anyanwu-Akeredolu a courtesy visit. We appreciated her passion for the girl child and women in general and how she has included environmental activities in the lessons being taught to the girls.

She was happy to see us and made remarkable comment about our involvement in the environment sector. She engaged us by sharing her stories on how she has impacted the society through the girl child. She has trained several girls from across different states in Nigeria in different skills and how they can be problem solvers within their societies which debunk the notion that the abilities of the girl child are limited. We sought for possible collaborations between Her Excellency's foundation "Be More" and the Eleven Eleven Twelve Foundation to which her response shows she is always available to partner with us as we make moves towards a healthy and safer environment.

EETF Team during the presentation of gift to Her Excellency

DURIAN VILLAGE: THE NEXT

We made a stopover at Durian Village to see the great work Tony Joy and her team members are doing in Imafon Community, Akure. They are taking great actions to promote the United Nations Sustainable Development Goals and create a sustainable and greener environment.

At Durian Village

From the tour, we discovered the act of reusing agricultural waste to create healthier, environmentally friendly products, teaching women the art of crafts to help them become self-employed.

The village also serves as a platform for educating young minds and creating a welcoming place for women to come together and discuss a better future. This is purely a way of contributing to her environment. We appreciated her efforts towards implementing her ideas to solve environmental problems with resources most people consider as “waste.”

CLIMATE STRIKE

“The love we give away is the only love we keep” - Elbert Hubbard.

In showing our love to the environment we engaged on a climate strike on Friday, 14th February 2020 at Preboye's junction, opposite the University of Ibadan. There were a total of 11 participants including climate activists, team members and passersby.

Climate Strikers

We observed a silent strike for the environment with our placards high in the sky with the words that plead for the protection of our planet.

SPONSORSHIP AND COLLABORATION

In a bid to support efforts and initiatives towards a sustainable planet, we embrace ideas that are keen and aligned with our goals and objectives.

ACTION GX, an organization that seeks to improve the quality of the environment and create awareness among the young people especially in schools and institutions on the local environmental problems and opportunities to create innovative solutions was one of our partners this quarter. On the 18th of February, 2020, we supported the organization by contributing waste drums which are to be distributed to schools. This is to enhance and encourage children to imbibe the act of a tidy environment and further include them in environmental affairs as they grow.

ONE DAY ENVIRONMENTAL SENSITIZATION

The United Nations SDG 17 seeks to strengthen global partnerships to support and achieve the 2030 targets. That is collaborative effort in reaching the 17 goals. In line with this, we joined the serving corp members in sensitizing the Market women at Owode Market, in Oyo town, Oyo State on the 20th February, 2020

Miss Yemisi Adeegbe and Mr Zadok Adeleye at the Environmental Sensitization

The Oyo State Commissioner for Youths and Sport Hon. Seun Fakorede addressed the participants assuring them of the government's support in keeping the environment clean and tidy. Upon the completion of the Honourable Commissioner's speech, the team

moved into a community that has zero knowledge about waste management. The youths cleaned up the community and sensitized people on the effects of plastic pollution. They got recyclables from the market women and encouraged all participants to get involved in walking the talk and becoming change agents in their various environments. All recyclables were bought by recycling companies. We supported this initiative through financial donation and our team's presence. The foundation was ably represented by Zadok Adeleye and Yemisi Adeegbe.

AKWA IBOM GREEN HANGOUT

The Akwa Ibom Green hangout was held at Discovery Park, Udo Umana Street, Uyo on the 22nd of February, 2020. The Director and Head of Department and Climate Change and Awareness, Elder (Mrs) Comfort Asuquo while addressing the participants, emphasized the need for youth's involvement in taking actions to reduce the effect of climate change. She further encouraged that every change that we are clamouring for must start with the participants present. The little things we do have a long way in affecting either positively or negatively, the environment. The program was a success with participant asking that the next green hangout comes up in a short time. The hangout was solely funded by EET Foundation

Participants

GRADUATE TRAINEE/INTERNSHIP

On the 2nd of March, 2020, the first set of Interns joined our team from the Pan African University resuming to the department of Research and Development, EET Foundation.

Their names are George Kofi Owusu and Obateru Rotimi. Our doors are open to students who are willing to intern with us. To be a part of our Internship program,

kindly send a mail to

enquiries@eetfoundation.org

with the subject of the mail as INTERNSHIP/GRADUATE TRAINEE

THE IBADAN SDGs HANGOUT

On the 5th of March, 2020, Eleven Eleven Twelve Foundation was represented at the Ibadan Sustainable Development Goals

Hon. Kunle Yusuff while addressing the participants

Hangout by the following team members; Adetunji Lam-Adesina, Zadok Adeleye, Oyinkansola Sosanya, Bolanle Sobowale and Yemisi Adeegbe.

The hangout exposed youths to the knowledge of the Sustainable Development Goals as well as to awaken in them the zeal to drive home these goals.

The convener, Mr Mayowa Olayomade posits that we should all do our best to come together by establishing new contacts and supporting each other.

Mr Joseph Owan focused on the history of the Sustainable Development Goals, highlighting on each of the goals and emphasised on the need for all hands to work together in ensuring that no one is left behind.

The SDGs gives us a platform to create a universal call to action to end poverty, protect the planet and ensure that everyone enjoys peace and no poverty.

The Oyo State Senior Special Adviser on SDGs, Hon. Kunle Yusuff was in attendance as he talked about the government's

interest and their plans towards ensuring the citizens of Oyo State live a peaceful and prosperous life. He encouraged the youths to keep sensitising people about the 17 goals which are key factors in promoting sustainable development in the nation. As he said, his office is always opened to initiatives that seek the eradication of poverty and hunger, reduced inequality and the fulfilment that no one is left behind.

EETF team members with the organizers

At the Panel Session which included, Hon. Yusuff, Mr Adetunji Lam-Adesina, Mr Joseph Owan and Mr Michael Ogundele. It was concluded that education and enlightening the public is the first step to achieving these goals, to which Mr Lam-Adesina advised that the youths should not leave everything to the hands of the government but take ownership

of their future by ensuring the use of SDG 17 to get things done as followers can sometimes lead and vice versa.

TOWARDS THE OYO STATE GREEN INNOVATION CHALLENGE

In a bid to promote transparency and to embrace collaborative effort, IMAGES initiative is working with potential partners who have contributed enormously to the Environment Sector in the Oyo State Green Innovation School Challenge. The members of IMAGES Initiative and EET Foundation team held a meeting on, Wednesday 11th March 2020 to discuss at length about the Oyo State Green Innovation School Challenge.

The vision of Africa Innovation School Programme was stated and the president of IMAGES Dr. Olawale Olayide reiterated the reason why the challenge is open to only Public Schools: this is as a result of the gap and differences between Public secondary schools and Private secondary schools across the nation. He emphasised that the vision is for the African continent especially on Agenda

2063. Launching out locally in Oyo state Nigeria with the mantra, **“Think Globally, Act Locally”**.

As an academia, he is passionate about bridging the gaps in the Academic circle, he believes that the academic sector goes beyond writing papers and journals but we should also embrace action.

Mrs Adegoke (Director for Africa Green Innovation School Programme) gave a succinct report on the journey so far especially in terms of collaborative effort with the Oyo state Ministry of Education, Science and Technology in securing an approval to carry out Oyo State Green Innovation School Challenge.

The General Manager of Eleven Eleven Twelve foundation, Barr. Adanna Kalejaiye was excited with the report of IMAGES Initiatives on a laudable project as this. She reiterated that IMAGES initiative idea is a part of EETF organisation's goal and emphasised the watch word for the new decade, which is “Decade of Action”. She was impressed with the allocated amount of

prizes as this seems to be more substantial compared to prizes allocated to such competitions in the educational sector. She advised that Innovative Programs like this should not be a one –off program rather it should be sustained in order to create a long lasting impact.

Mr. Adetunji Lam-Adesina (Founder; Eleven Eleven Twelve Foundation) noted the support of the foundation towards the program.

He continued by saying, the effort is commendable especially as it will focus on the continent at large. He also advised IMAGES Initiatives to explore other options like media support to propagate

Members of EET Foundation and IMAGES Initiative

the schools innovation, with this, the Oyo Green Innovation School Challenge will reach a larger audience leaving no one behind. Furthermore, he suggested that contents created by the schools

should be promoted to ensure a wider public coverage.

Dr. Olayide, President of IMAGES Initiatives expressed his sincere appreciation to the Organization for the support.

LIBERIA GREEN HANGOUT

The Liberia Green Hangout was sponsored by the Eleven Eleven Twelve Foundation in conjunction with AgroTech Liberia. The hangout focused on the importance of the youths in driving and promoting a sustainable environment. It was held at Voinjama City, Lofa County on Friday, the 13th March, 2020.

Participants came from all walks of life including youth organisations, schools, artisan union, learning centers, corporate social organisations, community college and farming groups. Members and head of these institutions were recruited to participate so they can serve as ambassadors to spread the message of environmental consciousness to the communities and their peers. A total of 120 People participated in the forum including the city council and the superintendents.

Participants

A total of ten youth organisations and CSOs were represented, fully participated in the discussion and contributed to development of ideas to sustainably maintain a green environment and ways in which youth can contribute in fighting the environmental challenges facing the region. Three schools provided students and representatives to form part of the forum.

The County Coordinator of the Environmental Protection Agency, Ambrose A. B. C. Jamina served as a Guest of Honour and carried out a presentation on government environmental policies, laws and programs intended to support the sustainable development goals and better environment for the communities. He responded to questions and concerns from the youths and cautioned them to serve as Ambassadors for the

environment in their communities.

Mr. Jonathan S. Stewart, Lead Campaigner for Agro Tech Liberia provided an overview on the growing environmental issues confronting Liberia including plastic pollution, flooding, uncontrollable waste, deforestation, traditional agricultural practices, climate change and the role of youth in sustaining the environment. He called on the youths to take ownership of the effort to promote a green and sustainable environment because their future and wellbeing are directly connected to the condition of the environment.

The superintendent of Lofa County, Hon. William Tamba Kamba who was also present at the hangout called on the youths to collectively carry out activities aimed at keeping their cities clean and green. He promised to support the youth to achieve this. He also disclosed plans to put a stop to deforestation and open up parks for tourism as an alternative means of livelihood.

Participants were given the opportunity to proffer ideas and recommendations that could help policymakers and environmental organisations fight the challenges currently faced in preserving the environment.

- City government should place trash cans along the street for disposal of waste.
- Constitute environmental working group comprising of leaders of the communities to work with communities in management of waste.
- Establishment of Environmental clubs in schools that will carry out activities such as walk N pick, general clean-up campaign and awareness raising.
- Develop Local content environmental policy and laws to be implemented with fines and penalty for violators.
- Intensive education of communities on the impact of wastes and management techniques and skills.
- City government to establish a waste disposal sites for proper disposal of waste in the

communities.

- Local government should provide support to youth organisations to carry out environmental activities.

A networking session was created to link youth organisations so as to enable them design common actions for the communities and the environment.

Cross Section of the Participants

The organisations present were coached on how to work together on designing solutions for communities' problems. They discussed how best to carry out general clean-up campaign and awareness in the communities.

The Liberia hangout was publicised on several online media outlet such as WAP Liberia and Liberian Observer The hangout is an educative and solution driven environmental engagement, which provides insight on the various environmental issues and

ways young people can join the fight to maintain a sustainable environment for the future of the young and upcoming generations. Below are the links to the online publication;

WORLD'S LARGEST LESSON

ACTIVATION

EETF Team Members with the National Coordinator of the World's Largest Lesson, Michael Semiye.

The World's largest lesson held at the Tree Park, University of Ibadan, Ibadan on Friday, 13th March, 2020 is aimed at raising a generation of new thinkers. The National Coordinator; Michael Semiye while addressing the attendees noted; the narratives in our country will only change if the students in schools has a change of thought which is a reason we have to work together to promote a sustainable environment by building what has been destroyed. Mr Zadok Adeleye, Project Lead; Eleven Eleven Twelve Foundation emphasized the reason we need to work together to achieve the goals for the sake of our future as youths and incoming generations. The host, Mr Osikoyo Temitope (assistant Coordinator of world Largest Lesson Oyo State Chapter)

encouraged that we learn the goals by heart to serve as guide in each of our decisions. He finally, implored the youths to embrace the concept of “Innovative Volunteerism” and put it to good use by showcasing their skills, talents and initiatives as a solution to the challenges we face.

At the World's Largest Lesson

ONDO GREEN HANGOUT

The Program took place at The Federal University of Technology, Akure (Futa) Botanical Garden on Saturday, the 14th of March. The program started at 3:00pm with 49 participants already seated. The host, Coordinator of FUTA SDGs hub –Emmanuel Isika

welcomed everyone to the program and kicked off with the opening ceremony by introducing Green Hangout and giving a brief history of how it all started. He emphasized the aim of Green Hangout which is promoting environmental sustainability. The former coordinator of NYSC CDS group on SDGs, Emmanuel Kilaso led the introductory session among the participants. Mr Emmanuel Isika introduced the 17 goals of the SDGs and explained them in details to the audience for the benefit of those

who were not conversant with the SDGs.

Matters Arising: The session on 2020 outlook was anchored by Mr Oluwaseun Samuel who focused on the

problems provided by the questionnaire for the Green Hangout during the summit. During this session, the audience came up with amazing ideas.

A cross section of the participants at the Ondo Green Hangout

The problem with our environment which includes waste management, deforestation, pollutions of water bodies was brought to light and discussed extensively. Questions on what the government was doing were asked. Suggestions were made by the audience on how we could manage our waste by thinking of our environment, sorting our waste and positioning waste bins at public places for proper evacuation and disposal. At the end of the programme, everyone in the audience was admonished to be environmentally conscious. Group photographs followed suit and in all, it was a blissful event. The event was financially supported by EET FOUNDATION.

BENIN GREEN HANGOUT

The Benin green hangout was held on The 14th of March 2020 at the Ogba zoo and ecological garden, Edo State. The event was rated a 'success' as synergy and smarter ways of creating a sustainable environment were formed.

We were excited to welcome 29 participants to the event (including the organizing team), feed backs

gotten from participants were positive and highly satisfactory, from the speakers to venue choice, to the event line up of activities, spurring us to do more. This event engaged participants in a totally different way with renewed zeal to achieving environmental sustainability.

The Eleven Eleven Twelve Foundation did amazingly well by graciously sponsoring and having their Edo state focal person present. The interactive session saw participants raise issues bothering on environmental challenges prevalent in their communities and smarter ways of correcting them, an example is the carrot and stick method, where people are commended for their good work and punished for any wrongdoing.

Provision of waste bins at strategic points, creating behavioural change through aggressive awareness campaigns, all these were some of the micro solutions given while the macro solutions includes government investing in renewable energy, public transportation: reduction of carbon emissions.

The web game was played amongst participants where their hopes, commitment and pledges were made with the yarn and using it to create a link

between all.

The photo session and refreshments brought the event to a close.

The resource persons at the event included a representative of the Edo State office on Sustainable Development Goals, Mr Patrick Omene who spoke on his offices' plan of activities which is to sensitise the populace especially those in the rural areas of the state on the importance of achieving the SDGs. The Executive Director, Connected Advocacy; Mr Isreal Orekha spoke on the need to have more climate change actors.

Participants

EET FOUNDATION STATE REPRESENTATIVES

To spread our tentacles across the country, we have engaged environmental activists and change makers in several states to represent the foundation in executing our corporate goals in their respective states. A virtual meeting was held with the state reps on the 17th March, 2020 at which they introduced themselves to the house and were briefed on the activities of the foundation. The founder, Mr Adetunji Lam-Adesina admonished them to get involved and ensure we all work together and put to action our ideas to promote a greener environment.

GLOBAL RECYCLING DAY

U-Recycle Initiative Team during the Global Recycling Day

Global Recycling Day: The organization, U-Recycle Initiative, took to the streets for the World Recycling Day which is widely celebrated on the 18th of March, 2020. The team members, to mark this day sensitized people on the need to practice the 3Rs to keep our environment sustainable and healthy. To encourage children, they donated bins to schools to dump their refuse properly. This is to support the saying "Catch them young." It is essential to include sustainable living in childhood education by informing children, it inspires new ways of thinking about a better environment. The organization was financially supported by EET Foundation.

THE PUBLIC ENLIGHTENMENT INITIATIVE

We have a passion for a sustainable environment, and we are working towards our goals. Every weekend, our enlightenment team has been taking the eco-gospel message to several communities, educating them on reasons we need to protect our environment. We have been able to encourage several households to engage the proper use of waste disposal.

The EETF Public Enlightenment Team during sensitization

We also embarked on monitoring and evaluation of the areas we have touched. We are encouraged that several households are now abiding with the laws governing waste management in our societies. We hereby encourage everyone to contribute their quota to environmental sustainability.

CALL FOR STATE REPRESENTATIVES

As part of our drive not to leave anyone behind, we are spreading out across Nigeria and Africa.

We are currently looking for representatives in the following states;

- ✓ ABIA
- ✓ SOKOTO
- ✓ KANO
- ✓ IMO
- ✓ CROSS-RIVER
- ✓ TARABA
- ✓ DELTA
- ✓ JIGAWA
- ✓ NASSARAWA
- ✓ ANAMBRA

REQUIREMENTS

- ☑ Must be between Ages 18-30
- ☑ Must have passion for the Green Sector
- ☑ Must be driven by a better future
- ☑ Must possess people oriented skills

Interested and Qualified?
